

A COMPLETE STEEL  
SOLUTION UNDER ONE ROOF

**SUKRISH**  
SteelVridhi Pvt. Ltd

# THE LEGENDS HAVE ENGRAVED THEIR NAME

Introducing a complete steel solution under one roof, formerly known as Vikas Infra Steel, Sukrish SteelVridhi embodies commitment to innovation, excellence, and a customer-centric approach. Our new identity represents a fusion of strength, integrity, and forward-thinking ideals that will continue to drive our success. As Sukrish SteelVridhi, we will carry on to provide the same exceptional services and products you have come to expect from us. We remain steadfast in our dedication to delivering iron and steel solutions that exceed expectations, foster relationships, and create sustainable value across India. We have a decade-old legacy of supplying iron- and steel-based structural as well as infrastructure products. Today, it is preferred by the largest manufacturers, with more than a thousand dealers across Maharashtra and Gujarat. Our USP lies in the fact that we connect with manufacturers directly and work with close collaboration and shared market intelligence, which is a result of continuous customer engagement. At Sukrish SteelVridhi, we not only engage in the mere supply of a product, but we also believe in building trust for the long term. We are driven to rise with your trust and our vision. As a leading player in the rapidly growing steel industry, we cater to diverse industries such as construction, automotive, infrastructure, energy, and manufacturing. We pride ourselves on our strong customer relationships, operational efficiency, and dedication to continuous improvement.

## SUKRISH - GROWING WITH YOU

Sukrish SteelVridhi has a legacy of supplying of Iron and Steel based structural as well as infrastructure products. It's history dates back to more than a decade of customer satisfaction and outreach. Today Sukrish is a front end for some of the largest manufacturers in the steel sector. We connect with more than a thousand dealers across Maharashtra, Gujarat, Rajasthan and many other cities. Our USP lies in that we connect with the Manufacturers directly and work with close collaboration and shared market intelligence, which is a result of continuous customer engagement. At Sukrish we not only engage in mere supply of a product but we believe in building trust for the longer term. That's what makes us say "Sukrish - Growing with You"

At Sukrish we believe in continuous engagement with all the participants in the supply chain.

Decades of experience of our team remains at the core of any decision we make and that has been a fundamental thrust to our growth. We with our experience and team building provide following strategic benefits to any business

- Diverse Product Offering enabling a Shopping Cart Supply
- Multi-location supply
- Logistical Support
- Continuously addition to Product Offering
- Collaborating with Reputed Industry Manufacturers enabling supply of Industry Standard Products
- Shared Market Intelligence for better decision making
- Better Pricing courtesy Large Scale Operation and Manufacturers' Trust

## ADVANTAGE SUKRISH

## SERVICE PROCESS FLOW

At Sukrish, our process has evolved over years of experience and tests of time. Today it has evolved as a highly efficient and customer centric flow. Today we are known in the market for the services we offer and have a lot many testimonials to this account.

## SUKRISH OFFERS

At Sukrish, we warehouse more than thousand of tonnes of Steel based structural and infrastructural products sourced from some of the largest Manufacturers who adhere to strict quality controls complemented by internal checks at our warehouse as well. These products comply with various industry standards, Indian as well as international. Products not listed here can also be supplied subject to applicable minimum order quantity. Also kept under roof and in-house weight bridge causes reach for what you are paying.

## MILD STEEL TUBES SEGMENT

These tubes are made from steel Coils which are roll-formed in a Tube Mill with ERW process. These are either made out of Hot Rolled Metal or Cold Rolled Metal (which give more precise features with least tolerance) in finishes as Black (Uncoated), Oil/Varnished, Hot-Dip Galvanised (GI) and Pre-Galvanised. We offer Tubes with Yield Strengths ranging YST 210 and upto YST 355 subject to conditions.

These MS Tubes find a variety of applications in various forms like -

- Structural and Constructions like Parking Lots, Low Cost Housing
- Mechanical and General Engineering like Automotive, Storage Systems, Furniture
- Flow of Fluids and Water like Irrigation
- Industrial Applications
- Fire Protections
- Many others where strength and formability of steel is warranted

## Standards

These Tubes and Hollow Sections are made from Steel which satisfy Indian as well as International Standards. The grade, dimensions, finishes and every other aspect of the product complies with published Indian and International Standards. Products offered comply standards such as IS, ASTM, BSEN, EN, DIN, API and other guiding publications. We at Sukrish have a dynamic product portfolio which keeps on evolving and accomodating newer requirements.

## Round Tubes - Hot Rolled

### NB Series (Nominal Bore)

| Nominal Bore |       | Out Dia | Thickness (MM) wise Nominal Weight (Kg/6Mtr.) |     |     |     |     |     |     |     |     |     |     |     |     |     |
|--------------|-------|---------|-----------------------------------------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| MM           | Inch  | MM      | 0.6                                           | 0.8 | 1   | 1.2 | 1.4 | 1.6 | 2   | 2.6 | 3.2 | 3.6 | 4   | 4.5 | 5   | 6   |

\*These are part of our regular offering. Size, Dimension, Thickness and Material Specification, other than listed here can be supplied on an order basis which may be subject to a Minimum Order Qty.

## Lock System

SPIGOT

JOINT PIN WITH RING

## ADJUSTABLE BASE JACK

## ADJUSTABLE U-HEAD JACK

## U-HEAD JACK

## UNIVERSAL JACK

## STEEL WALKBOARD (HOOK TYPE)

## LOCK SYSTEM - VERTICAL STANDARD (OPEN END)

Top Cup  
(Casted / Drop Forged)

Bottom Cup (Pressed)

## Galvanised Iron (Hot Dip) (GI) Finish

Roll-Formed Steel Tubes undergo hot-dip galvanising wherein manufactured tubes are dipped in tanks of Molten Zinc. This process forms a corrosion resistant layer of Zinc. It is highly efficient to use in highly corrosive applications like Plumbing, fire-fighting, underground laying, refineries and many others. It has Zinc Coating ranging between 350 ~ 400 GSM as per requirement and application.

## Pre Galvanised (GP) Finish

These Tubes are made by roll-forming Pre-Galvanised Steel. They give high corrosion resistance in an affordable costing. It has Zinc Coating ranging between 80 ~ 110 GSM as per requirement and application. It is highly efficient to use in corrosive environments like Coastals and applications like fencing, automotive body making, structures, electricals and many others.

#### Above Round tubes are available in below end finishings-

Plain End, Threaded and Coupled, Grooved, Cut Lengths subject to minimum order feasibility, The same is available in GP&GI round pipes.

\*These are part of our regular offering. Size, Dimension, Thickness and Material Specification, other than listed here can be supplied on an order basis which may be subject to a Minimum Order Qty.

\*Above weights are indicative only. Confirm before placing order.

## Cold Rolled Tubes and Hollow Sections / Precision Sections

Precision tubes offer many advantages such as close tolerances on diameter & thicknesses, exceptional concentricity and a smooth finish, both inside & outside of the tubes. These features enable designers to obtain uniformity of flow under controlled temperature, pressure conditions, while fabricators can exercise greater control over close bending, tube alignment in butt welding and greater formability.

### Round Tubes

| Out Dia | Thickness (MM) wise Nominal Weight (Kg/6Mtr.) |       |     |      |     |       |       |
|---------|-----------------------------------------------|-------|-----|------|-----|-------|-------|

## Structural Steel

Structural Steel is manufactured by Hot Rolling of MS billets and castings which gives great strength, considerable formability, weldability and offers great economy. Cold Rolled plates are formed further by cold rolling of hot rolled steel which reduces tolerances and increases formability. These products are sourced from reputed Manufacturers and are as per industry standards.
